

The graphic features a diagonal design with a grey background on the left and a white background on the right. A thick orange diagonal stripe runs from the top-left towards the bottom-right. The text is positioned in the white area on the right side.

# **VeriFone POS System Solution**

**PCNC IT Solutions is a VeriFone VIP Partner which offers EMV integrated POS solution helps merchants manage their business effectively. From accepting customer payments, aligning the systems and platforms to facilitate the payment - connecting your POS to your payment processor, to provide customers with a reliable, and safe point of sale processors. Our team of experts got you covered!**

## **Verifone POS Solutions**

PCNC IT Solutions provides reliable Verifone POS software development and solutions that run operating systems, security and encryption software, and certified payment software for both payments and commerce on VX (Verix V and eVo) and Android terminals.

## **Verifone Customization**

PCNC IT Solutions customizes & configures all Verifone systems, creating payment solutions with UX modules to include multi-payment options such as mobile wallets, EMV, NFC, Apple Pay, and self-service allowing for customizable layout configuration, faster adoption & greater ease of use.

## **We Ensure your Compliance with PCI & EMV**

PCNC IT Solutions Verifone development experts ensure your custom payment software complies with consumer protection standards including PCI-DSS, PA-DSS, EMV, Check-21, data encryption, and other payment standards.

## **Multi-Currency Processing Solutions**

We maximize and expand your merchant global reach with customized multi-currency and multi-lingual support with Dynamic Currency Conversion (DCC) capabilities for e-commerce transactions.

## EMV CUSTOM TAILORED SOFTWARE SYSTEMS

Our developers customize EMV chip software technologies for variety of businesses to support payment protection and compliance.

We offer end-to-end EMV migration services including EMV compliant software programming, testing, and validation for full and semi-integrated solutions

## Contactless Payments

PCNC offer Contactless transactions using proximity NFC Verifone devices. These devices allow transactions to be made by waving or tapping on an EMV Contactless enabled terminal. Similar to contact chip cards, they also support cryptographic functions for more secure transactions than with traditional magnetic-stripe cards.
